Art Unit: 1746

Election/Restriction

The applicant's election of apparatus claims 1-3 has been acknowledged. Claims 1-3 has been canceled and claims 4-18 are pending in this application. Therefore, a new restriction is required.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I: Claims 5-17, drawn to an apparatus comprising a support cart having a front end, a rear end, a docking plate, and a hydraulic pressure system; a conveyor means and a mechanical sweeper, classified in Class 99, subclass 277.

Group II: Claim 4 and 18, drawn to a method for removing wine pomace from a fermentation tank, classified in Class 134, subclass 22.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (M.P.E.P. § 806.05(e)). In this case the apparatus as claimed can be used to practice another and materially different process such as transferring objects from the tank or removing sludge from the tank.

A telephone call was made to Mr. Gary Hoenig on February 9, 2006 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.
